Education

Pandit Deendayal Energy University **Gandhinagar, Gujarat**

Bachelor of Technology in Computer Science and Engineering, CGPA: 9.48 *2020 – 2024*

Experience

Software Engineer **July 2025 – Present**

Aasma Technology Solutions *Ahmedabad*

- Contributed to a cutting-edge AI-driven web platform, adding new features and improving existing functionality using React.js and TypeScript.
- Collaborated with cross-functional teams to develop scalable frontend modules and integrate RESTful APIs with dynamic data visualization.
- Worked closely with the product and QA teams to debug, test, and deliver scalable frontend solutions.

Software Engineer **Nov. 2024 – June 2025**

Helmsman Consultancy *Ahmedabad*

- Developed and maintained a telemedicine platform serving 1000+ patients and doctors, implementing key modules for patients, doctors, and admin roles.
- Integrated Agora for real-time video consultations and Cashfree for secure payment processing.
- Built end-to-end appointment booking flow enabling seamless scheduling and virtual consultations.

Software Developer Intern **Jan. 2024 – June. 2024**

Surekha Technologies *Ahmedabad*

- Trained in ReactJS and Liferay; worked on internal projects and maintained the old company website
- Contributed to improving the main company website, focusing on performance and user experience.

Technical Skills

Languages	Typescript, JavaScript, C/C++, Python
Tech stacks	ReactJs, NextJs, NodeJs, Tailwind CSS, HTML, CSS
Databases & Tools	MongoDB, Firebase, MySQL, Git, Postman, Figma

Projects

Finance Tracker | *ReactJs, Firebase*

- Designed and developed a comprehensive finance tracking web app offering a seamless user experience for income and expense management. Also,featuring secure authentication and dynamic dashboard with real-time data visualization, and transaction management.
- Integrated CSV import/export functionality and responsive design, enhancing user experience across devices.

Job application tracker | *ReactJs, Nodejs, MongoDB*

- Built a job application tracker with features to add, edit, delete, and search applications, enabling users to maintain a comprehensive record of their job hunt.
- Added status-based filtering and keyword search to streamline tracking and follow-ups, while gaining experience in building and integrating RESTful APIs.

Personalized Dashboard | *ReactJs, TailwindCSS* **Live Link**

- Designed and developed a customizable dashboard application that allows users to create and organize categories with tailored widgets. Also implemented dynamic widget functionality for data visualization using charts.

Comprehensive Project Portal | *ReactJs, Tailwind, NodeJs, MongoDB*

- Built a platform to streamline final-year project allocation, replacing manual, Excel-based processes and improving administrative efficiency
- Developed role-based access with tailored dashboards and approval workflows for students, mentors, and administrators, enhancing transparency and collaboration.

Achievements & Certification

- Honored with Study in India Scholarship to Study B.Tech. Computer Engineering in PDEU.
